STATISTICAL INDICATORS
January 1994

Tasmanian Statistical Indicators January 1994

WILLIAM P. McREYNOLDS Deputy Commonwealth Statistician

COMMENTARY

Employment

Tables 3-8, pages 2-7

The Australian and State trend comparisons, shown on page iv, indicate that there was a decrease of 0.7 per cent in Tasmania's employment over the year to November 1993. All other States showed an increase in employment over this twelve months' period. The largest increase in employment was in Western Australia (where employment increased 4.7 per cent). The next highest increase in employment was in Queensland (2.1 per cent), followed by NSW (1.7 per cent), and Victoria (1.0 per cent) and South Australia (0.2 per cent).

Compared with November 1992, regional estimates of (unadjusted) employment in November 1993 showed an increase for the Northern Statistical Division of 5000. Employment also increased in the Hobart and Southern Statistical Division of 1400 over the same 12 months. Employment in the Mersey-Lyell Statistical Division decreased 6900.

Unemployment

Tables 3-8, pages 2-7

The Tasmanian trend series estimate of 28 300 unemployed persons in November 1993 was an increase of 2200 on the figure for November 1992 of 26 100. The trend series estimate of the unemployment rate of 13.0 per cent in November 1993 was an increase in the trend series unemployment rate of 12.1 per cent in November 1992.

The Labour Force

Table 3, page 2

In November 1993 there was an (unadjusted) estimate of 363 000 civilian Tasmanians aged 15 or more. Of these, an estimated 217 400 (based on a trend series estimate) were in the labour force. The trend series estimate of the labour force participation rate in November was 59.9 per cent, comparable with the figure of 60.2 per cent in November 1992. For males the trend series estimate of participation rate was 71.0 per cent (compared with 72.3 per cent in November 1992). For females the trend series participation rate was 49.1 per cent (compared with 48.5 per cent in November 1992).

Employed Wage and Salary Earners

Table 9, page 8

In May 1993 there were approximately 154 900 employed wage and salary earners in Tasmania. This compares with approximately 146 700 in May 1991.

In May 1993 the Tasmanian public sector accounted for 31.5 per cent of all employed wage and salary earners. In the Tasmanian economy, the category Community services had the highest industry representation (27.2 per cent), up from the equivalent figure of 26.9 per cent recorded in May 1991. The next highest industry grouping was Wholesale trade and Retail trade (21.9 per cent, up from 18.7 per cent in May 1991) followed by Manufacturing (14.0 per cent, down from 15.9 per cent in May 1991).

The category Recreation, personal and other services was up from 7.9 per cent in May 1991 to 8.7 per cent in May 1993.

In May 1993, women made up 45.8 per cent of all employed wage and salary earners. In May 1991, the equivalent figure was 44.1 per cent.

Award Rates of Pay Indexes

Table 14, page 10

For the 12 months ended October 1993 weekly award rates of pay indexes for Tasmania rose by 0.4 per cent for full-time adult females and by 0.3 per cent for full-time adult males. For Australia, the figures were 0.8 per cent for females and 0.7 per cent for males.

For full-time adult female employees, the largest industry increases over this 12-month period occurred in Public administration and defence (2.1 per cent) and Recreation, personal and other services (0.8 per cent).

For the same period for full-time adult male employees, the largest industry increases occurred in Recreation, personal and other services (1.1 per cent) and Community services (0.8 per cent).

The largest occupation increases over the period for full-time adult female employees occurred in Clerks (0.6 per cent) and Labourers and related workers (0.6 per cent), and Salespersons and personal service workers (0.3 per cent).

For full-time adult male employees the largest occupation increases over the period occurred in Clerks (0.7 per cent),

Professionals (0.5 per cent), and Para-professionals (0.4 per cent).

House Price Indexes

Hobart had the second highest increase in percentage change for Established House prices, and the highest percentage change increase for Project Homes of the eight capital cities over the past 12 months.

For the 12 months ended September 1993 Hobart recorded a 5.0 per cent increase in the cost of Established Homes, with the extremes being minimal movement in Canberra of 0.4 per cent, and the largest increase in Darwin of 16.1 per cent.

For the same period Hobart recorded a 4.1 per cent increase in the cost of Project Homes, marginally ahead of Adelaide with an increase of 4.0 per cent, and Melbourne and Darwin both increasing 3.6 per cent. The lowest increase was 1.8 per cent in Darwin.

The movement recorded in Hobart for the September quarter 1993 was 0.8 per cent for Established Houses and 0.4 per cent for Project homes. This is the lowest quarterly increase for Project Homes since the corresponding quarter last year, when the increase was also 0.4 per cent.

House Price Indexes: Eight Capital Cities,

September Quarter 1993 (ABS Catalogue No. 6416.0)

Released: 22 December 1993

Price: \$27.50

Livestock Slaughtering

Table 21, page 16

With the slaughterings of calves falling to their off-season levels (300 killed in November 1993 compared with 10 800 a couple of months earlier in September 1993) slaughterings of other cattle increased. In November 1993, cattle killed for meat production numbered 15 000 compared with 14 100 in October, a rise of over six per cent. The November figure was similar to that of November 1992, when 14 700 slaughterings were reported. Revised figures for year 1992–93 show a total of 99 000 cattle slaughterings compared with 104 700 the year before.

Increases between October and November were also recorded for slaughterings of sheep and lambs. For sheep the increase was nearly 28 per cent, from 31 000 to 39 700, while for lambs the increase was less; from 30 000 to 32 000, a rise of just under seven per cent. Revised annual figures for 1992-93 show that a decrease in slaughterings of lambs by 6.8 per cent from the year before (489 800 in 1991-92; 456 500 in 1992-93) was

nearly balanced by a 5.9 per cent increase in sheep slaughterings (446 700 in 1991-92 to 473 400 in 1992-93).

Slaughterings of pigs, again in typical yo-yo fashion, rose between October and November from 6 400 to 7 900, a rise of just over twenty-three per cent. (Between September and October there had been a twenty-one per cent drop, and a month earlier a seventeen per cent increase.) For the year 1992–93 a total of 92 500 pigs were slaughtered, nine per cent more than the year before.

Livestock Prices

Table 21, page 16

Rises in average prices paid for animals occurred for all animals except sheep. Pigs recorded the biggest price rise, nearly sixteen per cent, from \$130.31 in October to \$150.99 in November 1993. This was the highest price recorded for pigs for over a year, and almost nine per cent more than the \$138.93 record in November 1992.

Cattle (excluding calves) showed a small increase of 1.4 per cent between October and November, with \$565.41 recorded in November. This was, however, over nineteen per cent more than the \$473.66 recorded in November 1992.

The rise in average price paid for lambs was just over four per cent, from \$27.53 in October 1993 to \$28.67 in November 1993. Like cattle, this price showed a similar increase over the year; just under twenty per cent higher than the price recorded in November 1992.

The average price paid for sheep fell by just over ten per cent between October and November, from \$7.90 to \$7.07. The November 1993 price was just three cents more than that of November 1992.

Forest Products

Tables 24-26, page 18

The total quantity of logs delivered to sawmills and woodchip mills in the September quarter 1993 was 1.21 million cubic metres, an increase of 8.6 per cent when compared with the September quarter 1992 figure of 1.11 million cubic metres.

Production of sawn timber in the September quarter 1993 was 88 100 cubic metres, almost unchanged from the September quarter 1992 figure of 88 000 cubic metres, but 7.5 per cent more than the 81 900 cubic metres recorded in the June quarter 1993.

In the September quarter 1993 the quantity of logs delivered for production of woodchips was 970 400 cubic metres, 9.4 per cent more than in the September quarter

1992. Over the same period the quantity of woodchips produced increased by 7.3 per cent to 1 027 900 tonnes.

Building Approvals

Table 27, page 19

There were 351 new dwelling units approved in Tasmania during October 1993 an increase of three per cent on the number recorded for September 1993 (351) but a three per cent decrease on the October 1992 figure of 363.

For the twelve months ended October 1993 there were 4116 new dwelling units approved, three per cent higher than for the previous corresponding twelve months (3995).

The latest trend estimates available for the number of dwelling units approved show a levelling off over the last three months after five months of increases.

The value of all buildings approved in October 1993 was \$31.5 million compared with \$46.8 million in September 1993 and \$31.3 million in October 1992.

The value of all buildings approved, at average 1989–90 prices, in the September quarter was \$113.0 million, 17 per cent above the June quarter 1993 figure of \$96.4 million and 32 per cent above the September quarter 1992 figure of \$85.9 million.

New Motor Vehicle Registrations

Table 34, page 23

There were 1233 new motor vehicles (excluding motor cycles) registered in Tasmania during November 1993. This was 16 per cent more than in October 1993 (1065), and 36 per cent more than for November 1992 (905). There were 280 rental vehicles registered in November 1993.

Registrations for the twelve months ended November 1993 (12 797) were nearly two per cent higher than for the figure recorded for the twelve months ended November 1992 (12 588).

Retail

Table 35, page 23

After going through a period of decline in the early months of 1993 the trend estimates of turnover for retail and service establishments, for Tasmania, show growth of over 1.0 per cent for each of the last three months.

The monthly trend estimate for October 1993 was \$214.8 million, an increase of 1.2 per cent on the estimate for September 1993 and up 3.5 per cent on the estimate for October 1992 of \$207.5 million.

The trend estimate of turnover for October 1993, for Australia, was 3.3 per cent above that for October 1992. For the past three months all states, except Victoria, have shown growth in monthly trend estimates.

In original terms the estimate of retail turnover in October 1993, for Tasmania, was \$212.3 million, an increase of one per cent on the figure for October 1992.

Private Mineral Exploration

Total expenditure on mineral exploration (other than for petroleum), in Tasmania, was \$1.7 million in the September quarter 1993. This compares with total expenditure of \$2.8 million in the June quarter 1993 and \$1.1 million for the September quarter 1992.

Approximately two thirds of the expenditure is on exploration for copper, lead, zinc, silver, nickel and cobalt. The remainder is expended on gold exploration.

Actual and Expected Private Mineral Exploration, Australia, September Quarter 1993 (ABS Catalogue No. 8412.0)

Released: 20 December 1993 Price: \$10.20

Gross State Product

The Tasmanian Gross State Product, based on trend current price estimates, rose 1.1 per cent in the September quarter 1993. The Australian Gross Domestic Product rose 1.3 per cent during the same period. (Gross State Product and Gross Domestic Product are conceptually identical.) For Tasmania, growth in wages, salaries and supplements of 1.7 per cent was offset by a 1.0 per cent fall in gross operating surplus.

(a) Source: Australian Dairy Corporation (b) Bottled and canned (c) Changing productivity per staff-hour makes these indicators unsatisfactory for long-term comparisons. (d) For sale as such; excludes production for use within the same enterprise. (e) Output from selected establishments covering the smelting and refining of lerro-alloys, zinc and aluminium. The weighting pattern is based on the establishments' value added as derived from the 1979-80 Manufacturing Census. For multi-product establishments, value added was apportioned to products on the basis of gross receipts from each product. (f) Includes the whole milk equivalent of farm cream make. (g) Includes bitter equivalent of butter od. (h) Includes spirning, weaving and carpetinaking. Reported by establishments which manufacture textiles only, or manufacture clothing and textiles in the one plant. (i) Production low due to annual close-down.

(a) Due to changes to the Bunking Act 1959 in December 1989, which removed the distinction between trading and savings banks, figures previously published in this table are no longer comparable with those shown above, (b) Details are the averages of weekly figures for each month. The figures are derived from returns submitted by banks authorised under the Banking Act together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank. (c) Excludes non-resident loans.

June	51 154	258	6 067	57 479	54 777		

(a) The following persons are not included in these statistics: passengers under three years of age accompanied by an adult; passengers travelling on chartered flights with minor carriers; passengers travelling on private or VIP flights; and passengers from or departing for overseas other than direct flights to New Zealand. (b) The proportion of departing passengers who were visitors was shown to be about 58 per cent in the 1981 Tasmanian Visitor Survey, 55 per cent in the 1984 Tasmanian Visitor Survey, about 53 per cent in the 1986 Tasmanian Visitor Survey and almost 65 per cent in the 1990 Tasmanian Visitor Survey and about 57 per cent in the 1992 Tasmanian Visitor Survey.

TABLE 32. TOTAL PASSENGER ARRIVALS BY AIR AND SEA INTO TASMANIA: SEASONALLY ADJUSTED AND TREND SERIES (a)(b)

Period	Original	Seasonally adjusted	Trend
1990) June	48 623	56 307	57 383
1992 June	52 234	62 996	63 726
1993			
April	75 269	67.590	68 050
May	51 655	67 264	68 315
June	57 479	69 496	68 577

(a) Prior adjustments for the changing dates of Easter have been made. (b) There is an annual recalculation of seasonal adjustment factors to include the most recent year's arrivals. This occurs at the end of each financial year and may cause revisions to previously published seasonally adjusted and trend figures. A full time series of seasonally adjusted and trend series from January 1971 is available on request telephone (002) 20-5870.

SYMBOLS AND OTHER USAGES

The following standard symbols are used in publications of the Tasmanian Office of the Bureau:

ASIC	Australian Standard Industrial Classification	Г	figure or series revised since previous issue
М	males	s	subject to sampling variability too high
F	females		for most practical purposes
P 👵	persons		not applicable
n.a.	not available		nil or rounded to zero
n.e.c.	not elsewhere classified		break in continuity of series (where a line
n.e.i.	not elsewhere included		is drawn between two consecutive figures in
n.p.	not available for separate publication,		the same column, or alongside two or more
	but included in totals where applicable		figures in consecutive columns)
n.y.a.	not yet available	(M)	Municipality
р	preliminary — figure or series subject to revision	(C)	City

Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

Values are shown in Australian currency.

SERVICES OF THE ABS

Central Information Service

The Central Information Service can supply statistical information in a variety of ways, including: over the counter, by telephone, by correspondence, by subscription, by facsimile and by photocopying from printed material. Published or special unpublished reports may be supplied. Electronic dissemination is available via TELESTATS, DISCOVERY and AUSSTATS. A variety of products and services for use on computers is also available. Phone (002) 20 5800

Library

The ABS Library holds a wide range of statistical material from Australian, international and other statistical agencies and other material on subjects relevant to the Bureau's activities. Members of the public may use the library between 8.30 a.m. and 5.00 p.m. Monday to Friday. It is located on the first floor, 175 Collins Street, Hobart.
